PROJECT SNAPSHOT

- **CLIENT / NETWORK:** Dubai Culture & Arts Authority
- **ROLE:** Creative Manager
- **THE PITCH:** Engineered a comprehensive, production-ready spatial proposal designed to transform structural canvas walls into an immersive environment.

Concept/ AI Gen

THE CHALLENGE

- **ABSTRACT IDEAS TO LOGIC:** Turning non-linear cultural themes into concrete, repeatable user-interaction logic.
- **COMPLEX ASSET CONTROL:** Tracking and cataloging hundreds of custom historical 3D assets mapped across volatile, physical public event spaces.
- **STAKEHOLDER SQUEEZE:** Bridging the deep operational gap between on-ground historians and cultural entity stakeholders in the UAE, and decentralized international production teams across the USA, Armenia, and Russia.

THE IMPACT

- **HYBRID FRAMEWORK:** Balanced strict, on-ground historical reviews by local UAE experts with fast visual prototyping across a global development hubs.
- **AI PIPELINE BOOST:** Deployed AI-assisted asset generation workflows to drastically shorten traditional 3D modeling and texturing times across different time zones.
- **AUDIENCE RETENTION:** Successfully boosted visitor stay-time by shifting from traditional glass-case displays to responsive, immersive environments.
