PROJECT SNAPSHOT

- **PROJECT NAME:** Million's Poet — National TV Broadcast Graphics Package
- **CORE THEMES:** Poetry, Calligraphy, and Cultural Heritage
- **ROLE:** Concept Developer
- **THE WIN:** Built a pioneering system that merged classical Arabic calligraphy with dynamic 3D animation. Created a high-end visual identity that protected heritage while modernizing a flagship national media brand.

THE CHALLENGE

- **THE MISSION:** Modernize the visual identity of a flagship national television program rooted in classical Arabic poetic and cultural tradition.
- **THE FRICTION:** Converting the fluid, rule-based curves of classical calligraphy into mathematically rigid 3D assets and motion graphics.
- **THE RISK:** High-visibility regional media brand with zero room for cultural or artistic errors.

THE IMPACT

- **PIONEERING FRAMEWORK:** Created a repeatable pipeline for merging traditional typography into dynamic 3D virtual studios.
- **UPFRONT QUALITY GATES:** Enforced authenticity reviews early, freezing vector outlines with calligraphy experts before rendering to eliminate expensive re-work loops.
- **TECHNICAL STANDARDIZATION:** Set strict polygon limits and camera tracking rules to ensure zero lag or system clipping during live virtual studio playback.
